

Things You Need to Know before You Install*

1) IP Address of Host or Gateway Server:

2) IP Port Number (normally 23 and 992, respectively):

* **Consult with your Site Communications Administrator to assist you in determining these settings.**

Remove Older Version

We highly recommend that older versions of T27 eXpress Net be removed prior to installation. From the Windows Task Bar, select **Run | Settings | Control Panel | Add or Remove Programs | T27 eXpress Net | Remove**. Note: Any configuration settings for the older version will NOT be deleted, but retained and applied to the new installation.

T27 eXpress Net Installation

The T27 eXpress Net Setup program will present a dialog that will step you through the installation process. Follow this procedure to install T27 eXpress Net:

1. Insert the T27 eXpress Net CD in your disk drive. The setup process should begin automatically.
2. Follow the instructions on the screen when presented.

If you have downloaded a version from our Web or FTP site, you will need to place all the files in a single temporary directory and run the T27eXpressNet.exe.

Note: For instructions that are more detailed, read **eXpress Net Quick Start Guide**, and reference the on-line help for the T27 eXpress Net Admin program and the T27 eXpress Net emulator.
