Things You Need to Know before You Install*

1) IP Address of Host or Host Gateway Server:

_____

2) IP Port Number (normally 23 and 992, respectively):

_____

For information on configuring and running T27 eXpress Pro, please reference the complete on-line help during the install and subsequent execution of T27 eXpress Pro.

* Consult with your Site Communications Administrator to assist you in determining these settings.

Remove Older Version

We highly recommend that older versions of T27 eXpress Pro be removed prior to installation. From the Windows Task Bar, select **Run** | **Settings** | **Control Panel** | **Add or Remove Programs** | **T27 eXpress Pro** | **Remove**. Note: Any configuration settings for the older version will NOT be deleted, but retained and applied to the new installation.

T27 eXpress Pro Installation

The T27 eXpress Pro Setup program will present a dialog that will step you through the installation process. We recommend that you take the defaults whenever possible. Follow this procedure to install T27 eXpress Pro:

1. Insert the T27 eXpress Pro CD in your disk drive. The setup process should begin automatically.
2. Follow the instructions on the screen when presented.

If you have downloaded a version from our Web or FTP site, you will need to place all the files in a single temporary directory and run UTSeXpressPro.exe.

T27 eXpress Pro Configuration

When you first execute T27 eXpress Pro, it will take you directly to the configuration dialogs where you can configure your first host connection and setup a screen to use that connection. Later, you may configure additional connections/screens with the following procedure:

1. Run the **T27 eXpress Pro** program/icon.
2. Click the **Configure T27 eXpress Pro** button on the **T27 eXpress Pro Control Panel**.
3. Press the **Configure** button.

From the eXpress Connect Visual Configuration window, you may add, edit, duplicate and delete routes and virtual destinations with the buttons and menu selections provided. In addition, extensive on-line configuration assistance is available by pressing the Help buttons or selecting the Help menu items where appropriate.
