KMSystems Has Moved

After surviving one of Georgia's worst droughts ever, the rain finally came—and just in time to postpone our move. Of course, we welcome the badly needed water, but it really played havoc when it came time for us to get the electricity in the ground.

But, all's well that ends well. Georgia shaved off about 6 inches from its water deficit, and I'm writing this from the comfort of my new office situated in the northern suburbs of Atlanta. Marietta, to be exact.

Please take this opportunity to update your records. Our new address is:

KMSystems, Inc.
3225 Shallowford Road
Suite 1000
Marietta, GA 30062-1275

And our new numbers are:
Main: (770) 635-6350
Fax: (770) 635-6351
Support: (770) 635-6363

eQuate Passes Beta Tests with Flying Colors

The "Application Cloaking Device" is ready for public release.

Where do you go if you want to create a PC application that interacts with a Unisys host? Naturally, you come to KMSystems and get Express Plus32 Professional.

But what if you want a development tool that contains its own Visual Basic-like programming language, a PC to legacy host connectivity module, and the ability to interact with the host without the user even knowing it's there? You still come to KMSystems, but you ask for eQuate.

Interest has been high for the newest product from KMSystems, and eQuate appears to be "the best thing since sliced bread." At least according to Steve Hoppe of Guardian Software Systems, Inc.

Steve Hoppe has been beta testing eQuate and couldn't be more pleased with the results he's already had. When asked about what eQuate will mean to the Guardian product, Mr. Hoppe said, "eQuate gives our applications a new look and feel, and much more maneuverability. For Windows users, this is everyday stuff, but the A Series could never do that, and we're very excited."

As more and more college graduates enter the work force with Windows programming experience, there is an ever-increasing need for Windows-based applications, like eQuate, that can access mainframe hosts.

For companies who staff employees with this predominantly Windows-oriented experience, "eQuate couldn't be simpler!" says Mr. Hoppe. "We have a co-op student working for us—and in only a week, he's well on his way to converting about 300 of our old A Series screens into new eQuate forms."

For more information about eQuate, please contact a KMSystems account representative.

Look for a more in-depth story about what Guardian Software Systems, Inc. has done with eQuate in a future issue.

www.kmsys.com Gets a Face Lift

We have redesigned our web site to offer a nicer look, better maneuverability, and a more pleasant experience overall.

If you are one of the hundreds of KMSystems customers who frequents our web site for current news, updated product information, or support answers, you may have noticed something different about the site. We have totally revamped the web site to make your visit much better. Here's a quick look at some of what's new.

When you first log on to www.kmsys.com, the 'great men in history' that you will see in our marketing materials over the next year will be there to greet you. Also, you will notice three drop-down lists.

The home page of www.kmsys.com is not only easier to navigate, but also sets the theme for the rest of the site.

Keeping Current

Current KMSystems product levels.

Product	Current Version
eQuate	Beta
InfoQuest **	5R6

Q-LINK	6R6
QPlex Client	2.x
QPlex Server	1.0
QPlexView	1.0
T27 Express Plus32	1.0
T27 Express Plus32 Pro	1.0
T27 ExpressNet32	1.0
UTS Express **	2.0
UTS Express Plus **	1.0
UTS Express Plus32	1.0
UTS Express Plus32 Pro	1.0
UTS ExpressNet **	1.1
UTS ExpressNet32	1.0

** No longer being enhanced (Contact KMSystems for upgrade offers.)

These tools are the basis of navigation from one area to another, for instance, moving from Press Releases to 2200 Productivity Tools.

Once in a specific area (at least, in most areas), a second navigational tool will be available. Use this to change pages within the area you are in.

The area with the most extensive change is "Product Data Sheets". Each KMSystems product page is now broken down into several pages allowing for much easier viewing and browsing. Among these pages are: "What is the Product?" where you will find a description written in layman's terms; "Product Specifics" for more technical information; and links to download documentation, view the on-line demos, request more information, download the evaluation (if available), and so on.

We hope you will find this new web site a valuable tool for your current or future KMSystems needs.

Editor in Chief:

Bob Moffa, Jr.
